

Immunizations at SHC

What immunizations we offer:

- **Hepatitis A** – for travel/precaution against food- or water-borne hepatitis; a series of 2 injections: day 0 and 6-12 months later. **\$23 each**
- **Hepatitis B** – for protection against blood/body fluid borne hepatitis; a series of 3 injections: day 0, 1-2 months, and 4-6 months. **\$30 each**
- **Twinrix**- (Hep A and B combined) – a series of 3 injections: day 0, 1-2 months, and 4-6 months. **\$48 each**
- **Influenza** – yearly, seasonal. **Price varies.**
- **Measles, Mumps, & Rubella Vaccine** – measles should be given twice since first birthday; mumps and rubella only once. **\$ 49**
- **Tetanus, Diphtheria** – initially 3 doses in childhood; after that every 10 years is recommended. **\$20 (Not currently available)**
- **Tetanus, diphtheria, acellular pertussis (Tdap)** – **Currently** a one time booster during a person's adult life. Strongly recommended during the recent Pertussis outbreak in Los Angeles County. **\$35**
